Key Features of Innowaves

> Enterprise Resource Planning (ERP)
> Flexible and Scalable
> Real-time Analytics and Reporting
> Mobility and Accessibility
> Integration Capabilities
> Security and Data Protection
> User-friendly Interface

> Enterprise Resource Planning (ERP):

Innowaves offers a wide range of ERP functionalities, including finance and accounting, inventory management, supply chain management, customer relationship management (CRM), human resources, and more. These modules are seamlessly integrated, allowing for real-time data sharing and collaboration across departments.

> Flexible and Scalable:

Innowaves is highly flexible and adaptable to accommodate the unique needs and workflows of different businesses. It can be customized to align with specific industry requirements and can scale with your organization as it grows.

07

> Real-time Analytics and Reporting:

Innowaves provides powerful analytics and reporting capabilities, allowing users to gain valuable insights into their business performance. It offers customizable dashboards, data visualization tools, and real-time reports to track key metrics, identify trends, and make informed decisions.

> Mobility and Accessibility:

Innowaves is designed to be accessible from anywhere, anytime, and on any device. It supports mobile applications, enabling users to access critical business information and perform tasks on the go, improving productivity and responsiveness.

> Integration Capabilities:

Innowaves seamlessly integrates with other systems and software, such as CRM platforms, e-commerce solutions, and third-party applications. This allows for smooth data flow and eliminates the need for manual data entry and duplication.
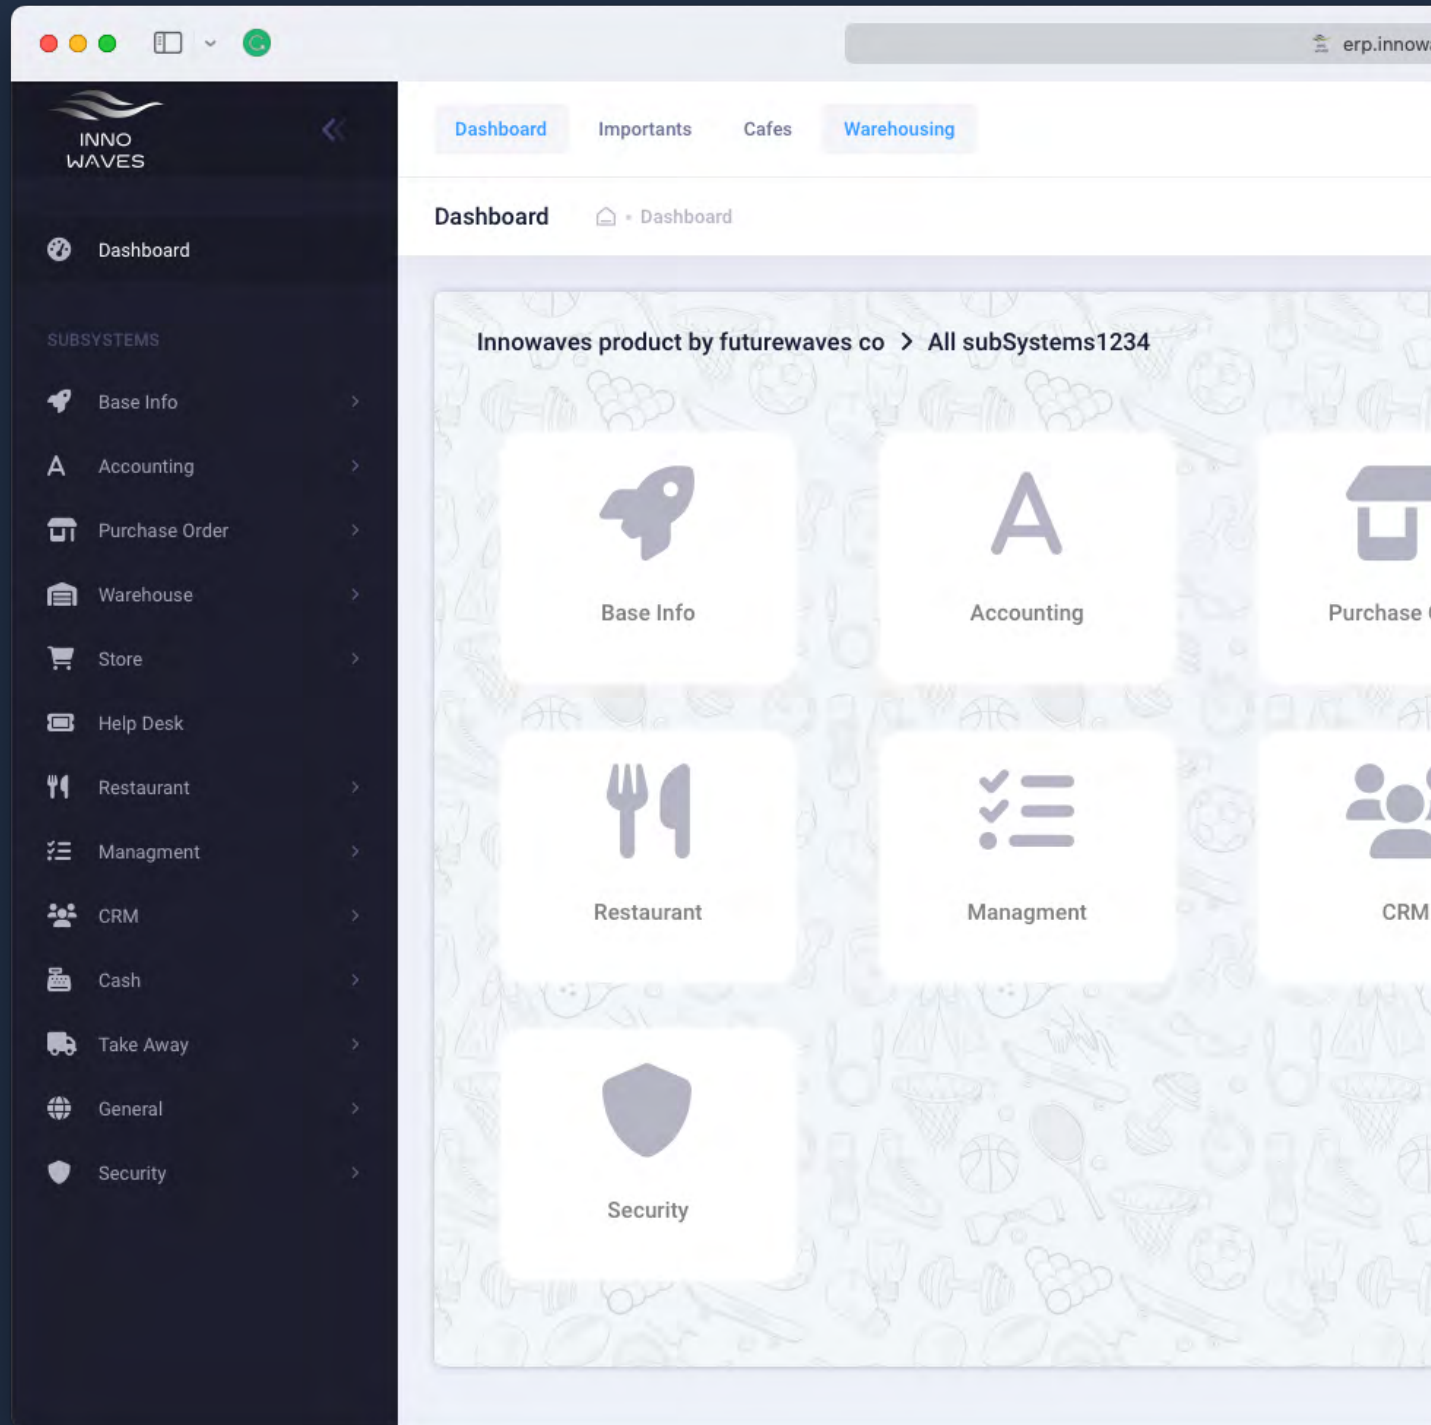

> Security and Data Protection:

Innowaves prioritizes data security and protection. It employs robust security measures, including role-based access controls, data encryption, and regular backups, to safeguard sensitive business information and ensure compliance with data privacy regulations.

> Accounting

The Accounting section of Innowaves, plays a crucial role in managing and organizing financial information. This section serves as a centralized hub where all financial activities and transactions are updated and recorded in real-time.

One of the key features of the Accounting section is the utilization of "floating detailed accounts" for our customers. These floating detailed accounts provide a dynamic and flexible way to track and manage customer transactions. By using this powerful feature, we can maintain a comprehensive and accurate record of all financial interactions with our customers.

Furthermore, the Accounting section in Innowaves ensures that all financial data is securely stored, organized, and easily accessible. It provides a user-friendly interface that simplifies the process of entering and retrieving financial information, saving valuable time and effort for our accounting team.

11

> Purchase Order

The Purchase Order section in our ERP software, Innowaves, is a vital component that streamlines the procurement process and ensures efficient purchasing operations. This section offers several key features that enhance the purchasing workflow and provide valuable insights.

One of the main features of the Purchase Order section is the ability to place orders and seek approval from supervisors for purchasing new items. This feature enables users to create purchase orders directly within the software, specifying the required items, quantities, and delivery details. Once the purchase order is created, it can be submitted for approval to the designated supervisor or manager. This workflow ensures proper authorization and control over purchasing activities, promoting transparency and accountability within the organization.

Additionally, the Purchase Order section provides a comprehensive view of the gross profit associated with each purchase. It calculates the difference between the purchase cost and the selling price, allowing users to analyze the profitability of their purchases. This information is crucial for making informed decisions regarding pricing strategies, supplier selection, and overall profitability.

By utilizing the Purchase Order section in Innowaves, organizations can streamline their procurement processes, maintain control over purchasing activities, and gain valuable insights into the profitability of their purchases. This section enhances efficiency, reduces manual errors, and facilitates better decision-making in the procurement domain.

> Store

The Store section of Innowaves, is a crucial component that empowers businesses to efficiently manage their inventory and sales operations. This section offers several key features that enhance the store management process and provide flexibility in offering discounts to customers.

One of the main features of the Store section is the ability to define different discounts on items or invoices. With Innowaves, businesses have the flexibility to set specific discounts on individual items or apply discounts to the entire invoice. This feature allows organizations to implement pricing strategies, promotional campaigns, or clearance sales by easily adjusting the discount rates as needed.

Moreover, the Store section enables businesses to provide discounts for specific groups of people. For example, on special occasions like Women's Day, businesses can offer discounts exclusively for women. This feature allows organizations to target specific customer segments and create customized promotions to enhance customer satisfaction and loyalty.

Innowaves also provides the functionality to determine tiered discounts for customers. This means that businesses can define different discount levels based on customer loyalty or purchase history. By implementing tiered discounts, organizations can incentivize repeat purchases, reward loyal customers, and foster long-term relationships with their clients.

By leveraging the Store section in Innowaves, businesses can effectively manage their inventory, streamline sales operations, and optimize their pricing strategies. The ability to define different discounts on items or invoices, offer group-specific discounts, and implement tiered discounts for customers provides a competitive advantage, enhances customer satisfaction, and boosts sales revenue.

> Restaurant

The Restaurant section of Innowaves, is an optional module designed to streamline operations and enhance efficiency in the food service industry. This section offers several key features that empower restaurants to manage their menus, inventory, and pricing effectively.

One of the main features of the Restaurant section is the ability to define every ingredient used in meals. Innowaves allows restaurants to create a detailed database of ingredients, specifying their quantities, units of measurement, and other relevant information. This feature enables accurate tracking of inventory and simplifies the process of managing stock levels. By having a comprehensive understanding of the ingredients required for each meal, restaurants can ensure seamless operations and reduce the risk of ingredient shortages.

■ Additionally, the Restaurant section provides the functionality to calculate the amount of ingredients needed for various meals. By linking ingredients to specific menu items, Innowaves can automatically calculate the quantities of ingredients required based on the number of orders received. This automated process saves time and effort for restaurant staff, ensuring accurate ingredient procurement and minimizing waste.

Innowaves also offers the capability to set discounts on specific meals. Restaurants can easily define discounts for certain items on the menu, allowing for targeted promotions and special offers. This feature enables businesses to attract customers, boost sales, and enhance customer satisfaction by providing discounted pricing options.

17

> Management

The Management section in our ERP software, Innowaves, is a powerful tool that provides senior managers with comprehensive control and visibility over various aspects of their business operations. This section offers a range of key features that enhance decision-making, facilitate efficient resource allocation, and provide a holistic view of the organization's performance.

One of the main features of the Management section is the ability to access all reports from different parts of the business in one place. Innowaves consolidates data from various modules and generates comprehensive reports that provide valuable insights into different areas such as sales, inventory, finance, and human resources. This feature enables senior managers to have a holistic and real-time view of the organization's performance, facilitating informed decision-making and strategic planning.

Additionally, the Management section allows senior managers to manage profit and income effectively. Innowaves provides tools to track revenue, expenses, and profitability across different business functions. By having access to accurate and up-to-date financial data, managers can analyze trends, identify areas for improvement, and make informed decisions to optimize profitability.

By utilizing the Management section in Innowaves, senior managers can efficiently monitor and control different aspects of their business. The ability to access comprehensive reports, manage profit and income, access detailed departmental reports, and provide permissions for purchasing empowers managers to make informed decisions, optimize operations, and drive the organization towards success.

19

> CRM

The CRM section of Innowaves, is a powerful tool designed to enhance customer relationship management and improve overall customer satisfaction. This section offers several key features that enable businesses to effectively manage and engage with their customers.

One of the main features of the CRM section is the ability to define real or legal customers. Innowaves allows businesses to create profiles for each customer, capturing important information such as contact details, purchase history, and preferences. This feature enables organizations to have a comprehensive understanding of their customers, facilitating personalized interactions and targeted marketing efforts. Additionally, Innowaves enables the generation of invoices for customers, simplifying the billing process and ensuring accurate record-keeping.

Moreover, the CRM section allows businesses to set different coupons for customers. This feature enables organizations to offer discounts or special promotions to specific customers, enhancing customer loyalty and driving repeat purchases. By tailoring coupons to individual customers or customer segments, businesses can create targeted marketing campaigns that resonate with their target audience.

Innowaves also offers the ability for the manager of the business to set discounts for specific groups of people. This feature allows managers to define discounts for particular customer segments, such as senior citizens or students. By offering targeted discounts, businesses can attract and retain customers from these specific groups, fostering customer satisfaction and loyalty.

Furthermore, the CRM section in Innowaves enables businesses to communicate with their customers through email and SMS. This feature allows organizations to send personalized messages, such as promotional offers or updates, directly to their customers' inbox or mobile devices. By leveraging this communication channel, businesses can keep their customers informed about discounts, special events, or new products, thereby strengthening the customer relationship and increasing engagement.

> Cash

The Cash section of Innowaves, is a vital component that enables businesses to effectively manage and track all income and expenses. This section offers several key features that streamline payment management and provide flexibility in handling different payment methods.

One of the main features of the Cash section is the ability to track and manage all income and expenses within the system. Innowaves allows businesses to record and categorize each financial transaction, providing a comprehensive view of the organization's cash flow. This feature enables accurate tracking of revenue, expenses, and overall financial performance, facilitating informed decision-making and financial planning.

Additionally, the Cash section provides a range of payment methods to accommodate different customer preferences. Innowaves supports various payment options, including cash, credit cards, coupons, and more. This feature allows businesses to offer flexibility to their customers, ensuring a seamless and convenient payment experience. By providing multiple payment options, organizations can cater to a diverse customer base and enhance customer satisfaction.

Moreover, the Cash section of Innowaves allows employees to use the system for managing payments. This feature empowers employees to process transactions efficiently, reducing manual errors and streamlining payment operations. Employees can easily input payment details, generate receipts, and record payments accurately, ensuring a smooth and organized payment process.

> Takeaway

The Takeaway section of Innowaves, is a valuable component that enables businesses to efficiently manage their online or telesales operations. This section offers several key features that streamline the process of selling products to customers remotely, whether through online platforms or over the phone.

Additionally, the Takeaway section allows businesses to add customer information such as address and phone number. Innowaves enables the creation of customer profiles, capturing important details that facilitate efficient order fulfillment. By storing customer information, businesses can easily retrieve and utilize this data for future orders and personalized marketing efforts.

> General

The General section of Innowaves, serves as a central hub that provides users with access to basic information about their business and allows them to manage different sections within the software. This section offers several key features that facilitate easy access to essential business information and enable users to make necessary edits when required.

One of the main features of the General section is the ability to view basic information about the business. Innowaves provides a centralized location where users can access important details such as the business name, address, contact information, and other relevant information. This feature allows users to have a quick and convenient reference point for essential business information.

Additionally, the General section allows users to access and manage different sections of their business within the ERP software. Innowaves provides a user-friendly interface that enables users to navigate to various modules and sections, such as sales, inventory, finance, and human resources. This feature ensures that users can easily access the specific areas of the software that they need to work with, enhancing efficiency and productivity.

> Warehouse

The Warehouse section of Innowaves, is a crucial component that allows businesses to efficiently manage their inventory and warehouse operations. This section offers several key features that enhance inventory control, provide detailed reports, and facilitate streamlined management of incoming and outgoing stock.

One of the main features of the Warehouse section is the ability to see the expiration date of products. Innowaves enables businesses to track the shelf life of their inventory items and provides visibility into the expiration dates. This feature is particularly important for businesses dealing with perishable or time-sensitive products, allowing them to effectively manage stock rotation, minimize waste, and ensure product quality.

Additionally, the Warehouse section provides a detailed report about the stock house. Innowaves offers comprehensive reporting capabilities that provide insights into inventory levels, stock movement, and other relevant metrics. This feature allows businesses to have a holistic view of their warehouse operations, enabling them to make data-driven decisions regarding replenishment, demand forecasting, and inventory optimization.

Moreover, businesses can manage the income and outcomes of the warehouse through the Warehouse section. Innowaves allows users to record and track stock movements, such as receiving new inventory, transferring stock between warehouses, or fulfilling customer orders. This feature ensures accurate and efficient management of incoming and outgoing stock, facilitating streamlined warehouse operations and minimizing errors.

Our Mission

Our mission is to empower organizations with a robust and user-friendly ERP software that enhances their productivity, efficiency, and decision-making capabilities. We aim to simplify complex business processes, improve collaboration across departments, and drive sustainable growth for our clients.

About Us

At Futurewaves, we are committed to providing innovative and comprehensive ERP solutions to help businesses streamline their operations and achieve their goals. With many years of experience in the industry, we understand the unique challenges that businesses face and strive to deliver tailored software solutions that meet their specific needs.
